

Integrated Receivables for Banks

Receivables Hub & Analytics Cloud

Achieving a Single-Click View Across All Incoming Receivables:

Receivables Hub & Analytics enables banks to offer a single platform for enterprise clients to achieve a holistic view of incoming receivables including all electronic and paper-based transactions, across all payment channels and banks. Receivables Hub & Analytics ensures:

- Out-of-the-box reports for review and exportable data for advanced analytics or reconciliation.
- Improved payments with an easy-to-deploy invoice communication system and customer self-service payments portal.
- An integrated view of all received payments that help teams save countless hours.

Benefits

Single Source of Payment Information

The hub integrates payment information from the lockbox, remote deposits, ACH, wire payments, credit cards or mobile payments into a unified payment stream to eliminate the need for managers to look into disconnected sources of data for reporting and decision-making.

Improved Analyst Productivity with User-Friendly UI Experience

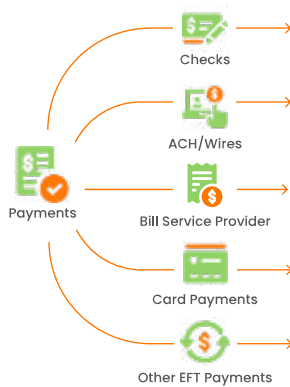

A user-friendly portal with a real-time, gives your analysts an integrated view of all received payments that help teams save countless hours lost in pulling outdated information across different data sources to achieve accurate historical tracking of payments. Bank-branded, user-friendly portal with easy-to-access payment information.

Holistic View of A/R with Enterprise-Level Visibility and Search Capabilities

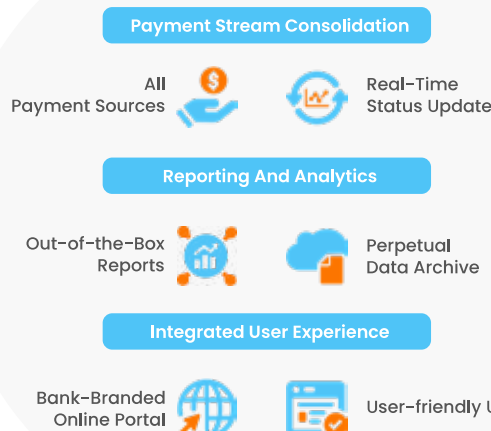

The hub enables a single-source of truth with current and historical payment information to share across stakeholders with high-fidelity search and indexing to enable filtered search with perpetual index of all payments across all sources.

Key Challenges

Lack of A Single Source of Truth For Incoming Payments Leading to Inefficient Reporting

The increasing volume of incoming payments is received through an ever-increasing number of payment channels including checks, deposits and the growing electronic payment formats including ACH, credit cards, wire transfers and mobile payments, making a single view more difficult to achieve.

How HighRadius Could Help Your A/R Team

Key Features

Payment Compatibility: Compatible with all incoming payment file formats

Complete Payment History Archive: Highly-scalable data repository capable of housing a virtually infinite payment history

Automated Payment Field Identification: Auto-identification of key payment fields for multi-field indexing

Out-of-the-box Reporting: Customizable reports available real-time for faster reporting
